TRANSFERABLE SKILLS

I spent …

- 7 years as a project engineer with a global engineering consulting company
- 3 years as a retail store manager with Australia's leading convenience store brand
- 20 years as a student in classrooms across the globe
- 25 years as a friend in different countries, cities and cultures

Cultivated in me...

- **Adaptability** – By travelling across the world, living in diverse locations, and forming new friendships, I learned to adapt with cultures, languages, values, business conduct laws, and traditions
- **Communication skills** – By dealing with clients, vendors and teammates, I nurtured not only good spoken and written communication skills but also familiarized myself with non-verbal behaviour
- **Critical thinking & problem-solving skills** – At times, I encountered situations without clear resolutions, where I called upon my critical thinking, problem solving, logical skills and creativity in order to find solutions
- **Team Spirit** – I have experience of working with small to large, as well as one to more than one teams
- **Innovative attitude** – I relentlessly strive to solve technical problems using out-of-box thinking
